£47 Heating Funnel Offer

Offer overview, source-derived details, RAG notes, and full video script

Prepared from the user-provided sales video script. Claims and time-sensitive terms below are not independently verified.

Offer overview

• **Offer:** Heating funnel blueprint and interactive demo.

• **Price stated:** £47 one-time payment.

• **Audience:** Heating businesses, particularly those offering boiler repairs, servicing, and installations.

• **Included as described:** A walkthrough of the heating funnel blueprint; a private interactive demo website; a library of case studies; and a behind-the-scenes look at an AI-powered boiler-quoting system.

• The transcript describes access to a blueprint and demo, not purchase of the complete done-for-you service.

System described

• A funnel intended to take prospects from their first click to becoming customers.

• Website journeys for emergency repairs and planned installation work.

• Boiler quote, service pricing, and emergency-response information, as described by the speaker.

• AI-assisted initial enquiry handling and multi-channel follow-up.

• Lead nurturing and appointment booking for emergency and planned work.

• Multiple traffic sources, with website data used to assess source performance.

Claims and conditions in the video

• The speaker claims over 250 clients, a team of 30+ people, and over 50,000 heating leads generated since 2017. These are video claims, not independently verified.

• A client is described as moving from about £250,000 annual revenue to seven figures. The transcript does not independently establish attribution or causality.

• The speaker says higher-level clients pay over £20,000 per year for the broader system. Verify current pricing and scope.

• A 30-day refund is described subject to watching the breakdown, accessing the demo, testing the AI follow-up assistant, and not feeling that the offer delivered more value than the price. Confirm current terms.

• Limited availability and exclusivity are stated as part of the sales pitch; current availability is not established.

Scope and RAG guardrails

• This transcript covers a heating/boiler funnel.

• A separate user note says a similar system is offered for solar businesses, but this transcript does not document solar-specific features. Do not infer those features from the heating version.

• Do not infer that the £47 purchase includes implementation, CRM subscription, ad spend, or the full done-for-you service.

• **Brand:** We Build Trades (WBT). **Source type:** Offer video transcript.

• **Suggested status:** historical_or_unverified until current price, contents, and refund terms are confirmed.

£47 OFFER VIDEO SCRIPT (timestamps as supplied)

0:03 If you own a heating installation company and you're struggling to
0:07 generate consistent high-quality leads without having to rely on overpriced
0:11 agencies or competing with five other companies for the same emergency call
0:15 out, this video will change everything. My name is Daniel Brown and in the next
0:19 8 minutes, my goal is to just show you the exact funnel that took one of our
0:24 heating clients from £250,000 per year after 14 years of being in business to
0:27 now doing consistently seven figures. And this is just one of our many
0:31 clients. Now look, you probably have no idea who I am, and that's fine. I'm not
0:36 a social media guru or content creator. I'm the founder of a UK-based business
0:39 called We Build Trades. And for the past eight years, we've been building these
0:42 all-in-one systems for home service businesses. At the time of this
0:46 recording, we have over 250 clients, 30 plus people in our team, and are known
0:50 for creating some of the best websites, marketing campaigns, and technology
0:54 integrations in the industry. But here's what makes this different. I actually
0:58 have ownership in a sevenfigure plumbing and heating business. So, when I talk
1:02 about what works, it's because we use these exact systems in our own companies
1:06 as well as for our clients. Now, here's what I want you to understand. Most
1:10 heating companies are still stuck using what we call the blockbuster model of
1:14 lead generation. They rely on word of mouth, referrals, and subcontract for
1:19 other companies like Box, Heatable here in the UK, and don't have a predictable
1:24 and dependable way to generate new leads on demand. Meanwhile, there are a select
1:27 few that have figured out the Netflix way. And that's what I want to show you
1:30 in this video. The heating companies that are absolutely dominating right
1:34 now. They've figured out the Netflix model of lead generation. They have
1:39 their own systems that generate qualified leads on demand 24/7 without
1:43 being at the mercy of seasonal fluctuations, emergency only work, or
1:47 unreliable referral sources. And here's where it gets powerful. We're now in the
1:51 age of AI, and most heating companies haven't even scratched the surface of
1:55 what's possible. While your competitors are manually answering emergency calls
1:58 and missing planned worked opportunities, AI can handle all the
2:02 inquiries, deal with prospects, and even book surveys and appointments, all
2:06 without human intervention. I mean, just think about it. Your prospects, they
2:11 want answers immediately. Whether it's an emergency breakdown or planning a
2:14 boiler replacement, they don't want to have to wait for business hours or for
2:18 someone to have to call them back. And AI gives them that instant gratification
2:22 whilst capturing their information when they're most interested. This is the
2:25 future of heating sales. This is the future of business in general. And it's
2:29 happening right now. But here's the problem. Most heating companies are
2:33 stuck in the old way of doing things. Maybe you right now are one of these
2:36 companies that's relying on word of mouth for referrals that come in
2:40 randomly. Maybe you're paying agencies thousands of pounds per month with no
2:43 real control over the lead quality. Or you're stuck doing low margin

2:47 subcontracting work. Maybe you're trying to figure out Facebook ads or Google ads
2:50 yourself and burning through budgets with nothing to show for it. Or maybe
2:54 you are getting leads, but they're not the type of leads that you want that are
2:58 going to give you the type of business that you want. The result, you're
3:02 working harder. You're competing on price for emergency work instead of
3:05 building value and planned installations. And a lot of the time,
3:09 you're going to be leaving a lot of money on the table every single day. And
3:13 to prove it, listen to what one of our clients had to say after we installed
3:17 this system into his business. We're now at the stage where probably a
3:20 lot of plumbing and central heating companies want to be at where, you know,
3:26 you're over a million pounds. But it's how do we go from a million to 5 million?
3:30 And the only way we do that is through a website like this. There's no other way
3:34 to do it. Let's be honest, 10 grand, we can have a website like Box. That sounds
3:37 like good value for money. There's no other way to do it. I like the system.
3:42 Yeah, I do like it. Now, this isn't just one lucky case study. Since 2017, we've
3:46 generated over 50,000 heating leads across multiple companies. We spent
3:49 hundreds of thousands of pounds testing and perfecting this system. And just
3:54 last month alone, our agency managed over £150,000 on Google Ads for our
3:58 clients. And the system that I'm about to show you, our highest level clients
4:03 are investing over £20,000 per year annually to access it. But here's what
4:07 makes us different. Most agencies only focus on one thing. Whether it's Google
4:11 ads, Facebook ads, websites, email marketing, lead and job management
4:15 systems, or whatever that one thing is. But in today's world, you need an
4:19 all-in-one system. And that's really what we bring to the table. We bring
4:23 everything together all under one roof and again are known for creating some of
4:28 the most advanced AI powered setups that are available today for the heating
4:31 industry. So with all that being said, what exactly is this Netflix style
4:36 system? Well, put simply, it's a complete heating funnel powered by AI
4:40 that is capable of taking someone who has never heard of you before from their
4:44 first click to becoming a customer, whether that's an emergency repair or a
4:50 boiler installation. Now, to break it down first, instead of hoping homeowners
4:54 will call you during an emergency, the system brings them to a website from
4:58 multiple traffic sources so you can see which traffic source is working the best
5:02 for your data. Then on the website, they can get instant boiler quotes. They can
5:07 get emergency response times and they can get the service pricing 24/7. So no
5:11 more waiting for business hours, no missed emergency calls turning into lost
5:16 customers. They input their details and through an AI powered conditional logic
5:20 system, they can see relevant heating solutions and pricing immediately.
5:24 Whether that again that's a repair or a full system. But here's where it gets
5:29 powerful. The system then uses AI to handle the initial inquiry and follows
5:33 up with prospects through multiple channels, turning emergency customers
5:37 into planned work opportunities. So, while your competitors manually
5:42 answering calls and missing follow-up opportunities, your AI powered system is
5:46 working around the clock, nurturing prospects and booking qualified
5:50 appointments for both emergency and planned work. It's like having a sales
5:55 team that never sleeps, never takes holidays, and never has a bad day. Now,

5:59 most of the kind of marketing courses out there would just tell you about a
6:02 system like this and not have any real results to back it up. But I'm going to
6:06 do something different, and what I want to do is give you access to a live
6:10 interactive demo of this exact funnel. This is something that I've never seen
6:14 done before. And instead of just telling you how good this system is like most of
6:18 these so-called experts are doing these days, this is a way for us to actually
6:22 demonstrate it. You can click through every page yourself. You can test the AI
6:27 chatbot to see how it works. You can see the instant boiler quotation system.
6:31 Experience the complete customer journey from emergency inquiry to planned
6:35 installation. And again, this is the actual system generating millions of
6:41 pounds in annual revenue across our highest level clients. It's kind of like
6:45 getting a behind-the-scenes tour of Netflix recommendation engine. And just
6:49 to make this 100% clear, I want to show you exactly what you're getting and why
6:54 this offer at this price, we are only offering it for a limited amount of time
6:59 while we establish ourselves in the new markets that we're targeting. For just a
7:03 one-time payment of £47, here's everything that you're going to get.
7:07 First of all, I'm going to personally reveal and walk you through the complete
7:11 heating funnel blueprint. Every page mapped out step by step for both
7:15 emergency and planned work on my computer. You're going to get access to
7:20 a private interactive demo website that is live clickable of the exact funnel so
7:23 you can see this working in real time and even test it. You're also going to
7:27 get access to a library of case studies that will show you real examples of
7:32 heating companies who actually have implemented this system and the exact
7:36 results that they've achieved. You're also going to get a behind-the-scenes look
7:40 at the AI powered boiler quoting system and how customers can get instant quotes
7:47 for repairs, services, and installations 24/7. And most importantly, you're going
7:52 to see for the first time ever the exact breakdown of the system that we have
7:57 spent 8 years at this time building for clients who are paying us over £20,000 a
8:01 year to run for them. But I'm not asking for 20K. I'm not even asking for £2,000.
8:06 You're getting the complete breakdown for just a one-time price of £47, which
8:11 when I say it even feels crazy. But the thing is, this offer, it isn't going to
8:14 last forever. We're offering this to a limited amount of heating companies,
8:18 mainly to be completely honest with you, as a way to get our foot in the door and
8:22 show business owners what we're actually capable of. I haven't seen another
8:25 company out there that has developed a system like this specifically for
8:29 heating companies who have the reputation that we have and the
8:35 incredible team across a wide range of skill sets. So, while we're trying to
8:39 scale up and tap into these new markets and can only work with a limited number
8:42 of companies in any area due to exclusivity agreements, we've put
8:47 together this offer to demonstrate our capabilities and build relationships
8:52 with heating companies who are serious about scaling their business.
8:56 And just to really go above and beyond, watch the entire breakdown, access the
9:01 interactive demo, test the AI follow-up assistant, and within 30 days, if you
9:05 genuinely don't feel like you got more value than what you paid, simply email
9:10 us, and we'll refund you every penny, no questions asked.
9:15 The heating industry is changing rapidly. AI is becoming the standard.

9:20 Advertising is getting more expensive, and the old way of doing things just isn't
9:23 going to cut it. You can either adapt to the Netflix model or get left behind
9:27 with the blockbuster model. Our heating system clients pay us £20,000 per year
9:32 for this system and we're only releasing it because we want companies to see
9:36 what we can do without having to outlay £20,000.
9:41 This is the real deal, the real system, the real funnel, the same template that
9:45 our highest paying clients are paying us to build for just £47.
9:51 If this video has resonated with you and you want to see how successful heating
9:55 companies are generating leads and closing deals, click the button below and
9:58 get access now before we reach capacity. And this offer genuinely expires.
10:02 This is an incredible offer. You're getting an insane amount of value and I
10:06 cannot wait for you to see this system for yourself. The future is here. The
10:09 question is, will you be a part of it? Thank you for watching and I hope to see
10:13 you on the inside.
